Carbon Reduction Plan

Supplier name	**BEAMBRIDGE MEDICAL LTD**
Publication date	**25/10/26**

Commitment to achieving net zero

BEAMBRIDGE MEDICAL LTD is committed to achieving net zero emissions by 2050.

Baseline emissions footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions.
Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline year: 2025

Additional details relating to the baseline emissions calculations:

Baseline year emissions:

Emissions	Total (tCO2e)
Scope 1	0.8
Scope 2	1.2
Scope 3 (included sources)	31
Total emissions	33

Current emissions reporting

Reporting year: 2026

Emissions	TOTAL (tCO2e)
Scope 1	.78
Scope 2	1.1
Scope 3 (included sources)	29.46
Total emissions	31.34

Emissions reduction targets

In order to continue our progress to achieving net zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 22.64 tCO2e by 2031.
This is a reduction of 30%

Carbon reduction projects

Completed carbon reduction initiatives

The following environmental management measures and projects have been completed or implemented since the 2025 baseline. The carbon emission reduction achieved by these schemes equate to 31.34CO2e, a 5.03% reduction against the 2025 baseline and the measures will be in effect when performing the contract.

CARBON REDUCTION

We have made reductions by switching to electric cars. Scope 2 sees major renovations of our office to take place over 2025 /26 to reduce our carbon footprint with insulating the property to a high standard.
Future developments to include solar panels and electric storage area that will in turn
Be used to charge the electric vehicle.
We aim to reduce our scope 3 emissions by reducing business travel by 50% over the next 3 years by communicating with our customers using on line forums such as Teams. Webinar's /Face Time meetings to reduce travelling. On line video tutorials that our customers can access through our web site. We also aim to purchase 100% renewable electricity once the market opens up to competitive quotations. Scope 3 will also include car sharing for employees and other modes of transport that reduce carbon emissions. Ongoing staff training such as food waste reduction to show staff good housekeeping. Closing doors and switching off lights will all help in reducing GHC emissions

WASTE REDUCTION

Landfill, Single use plastics, and other commodities that affect the environment is our top priority when implementing change towards GHC emissions reduction.
We reduce the waste we send to landfill. Carton Packaging where possible is re-used. We endeavour to make our suppliers refrain from using single use plastics.

Reduce other packaging to a minimum.
Sorting & recycling is a priority as well as donating old equipment for re use. Budgets are set for stationery purchases with wastage accounted for.

Future carbon reduction initiatives

In the future we hope to implement further measures such as:
WORKING WITH EXTERNAL SUPPLIERS

We seek to make our suppliers refrain from using single use plastics.
Reduce other packaging to a minimum.
Create a supplier code of conduct that sets our expectation with all suppliers adhering to our terms of trading and so help to improve the environment. Obtain their agreement to adhere to our terms

of trading and that they too will follow and implement similar objectives within their workforce as well as their suppliers.

Declaration and sign off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard[13] and uses the appropriate government emission conversion factors for greenhouse gas company reporting.[14]

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements (where required), and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standar

Emissions reduction targets

In order to continue our progress to achieving net zero, we have adopted the following carbon reduction targets.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the supplier:

Steven Mochrie
