BEAMBRIDGE MEDICAL LTD

ENVIRONMENTAL STATEMENT

Beambridge Medical is committed to reducing its carbon emissions to Net Zero by 2050.
Green House Gas emissions represent a large part of the company's environmental footprint. From travel to work, transport used, electricity used, paper & packaging wastage. Disposable commodities. All have an adverse effect on greenhouse gas emissions.

STRATEGY
Our strategy is to address GHG emissions and waste and strengthen our environment controls following all environmental laws and future legislation.

CARBON REDUCTION
We aimed to make reductions by switching to electric cars. This scope 1 objective was reached in June 2022 with our first purchase of a fully electric vehicle.
Scope 2 sees major renovations of our office to take place over 2023 to reduce our carbon footprint with insulating the property to a high standard.
Future developments to include solar panels and electric storage area that will in turn
Be used to charge the electric vehicle.
We aim to reduce our scope 3 emissions by reducing business travel by 50% over the next 3 years by communicating with our customers using on line forums such as Skype / Microsoft Teams. /Face Time. On line video tutorials that our customers can access through our web site. We also aim to purchase 100% renewable electricity once the market opens up to competitive quotations. Scope 3 will also include car sharing for employees and other modes of transport that reduce carbon emissions. Ongoing staff training such as food waste reduction to show staff good housekeeping. Closing doors and switching off lights will all help in reducing GHC emissions

WASTE REDUCTION

Landfill, Single use plastics, and other commodities that affect the environment is our top priority when implementing change towards GHC emissions reduction.
We reduce the waste we send to landfill. Carton Packaging where possible is re-used. We endeavour to make our suppliers refrain from using single use plastics.
Reduce other packaging to a minimum.
Sorting & recycling is a priority as well as donating old equipment for re use.
Budgets are set for stationery purchases with wastage accounted for.

WORKING WITH EXTERNAL SUPPLIERS

We seek to make our suppliers refrain from using single use plastics.
Reduce other packaging to a minimum.
Create a supplier code of conduct that sets our expectation with all suppliers adhering to our terms of trading and so help to improve the environment. Obtain their agreement to adhere to our terms of trading and that they too will follow and implement similar objectives within their workforce as well as their suppliers.
